Projects & Initiatives

Carnegie Mellon CS Scholars, Pittsburgh, PA

Jun'26 - Jul'26

Machine Learning Research Project: Predicting AI vs. Human Tutoring Preferences

- Designed and administered a survey of 200+ students to collect data on students' learning preferences.
- Cleaned and preprocessed survey data using one-hot-encoding and other introductory machine learning techniques.
- Developed and evaluated classification models to explore whether survey responses could predict preference for AI or human tutoring.
- Collaborated with a multidisciplinary team to analyze results and present research findings.
